“ Its still so unreal to me that you are gone. I know that we had our disagreements, but that's what siblings are for. We argue and then love each other unconditionally. Just know that I would never stop loving you. I just wish we spend more time with each other. I will always make sure that my son your nephew will always know who you are, just like I do with mommy. Don't forget give mommy a sloppy wet kiss for me.

“ So, a while back we were driving through old Pearland. We came across a turtle looking for water because all the grounds were bone dry. We pulled over and Michael jumped out and picked up the turtle who's shell was peeling already. We drove him to Alvin and took him to a pond near our house. Michael was quick to take him to the water.. This turtle we named Franklin swam in circles and came back towards Michael, like he was saying Thank You. How Michael's face lit up with joy... We would then visit Franklin on a regular basis until we moved.. Michael LOVED animals...

“ Michael (brother n law)

I wish I could turn the hands of time to spend more time with you, Raymond & I are going to miss you so much ... Especially the adventures we took together when you Raymond & me would go out to eat & then go shopping ... Y'all together always had me cracking up because y'all would argue over the silliest things, I had a blast when me & you use to game up on Raymond & you tell him it's ok you still love me tho

We do love you Michael always & Forever 🥰

“ During the hot summer new season of Houston, we were driving through Pearland and came across a helpless turtle. Michael was so quickly jump to save this turtle from being run over and then realized that he was dehydrated and his shell was drying out. He then proceeded to put the turtle into the trunk of the car and we drove him to a park in Alvin Texas that had a large pond. Michael then proceeded to grab the turtle and carry him over to the water. Now at the moment the turtle paused as he placed it on the water's edge, but in a matter of seconds the turtle jumped into the water swimming around in circles and came back and nodded his head at Michael. As if the turtle was thanking him, and after that Michael's face just lit up with joy.. We would make regular trips to check up on the turtle (Franklin)and he would always approach michael and swim in circles... He loved animals..
